

Christ Centered Christmas

Paper 3D Ornaments

Thank you for downloading this PDF. I hope that you enjoyed it as much as we did creating it.

There are several ways to make the bell, bauble, or star. You can print on colored paper, print and have the children color the ornaments, or use the template as a pattern and cut from construction paper.

After you have cut out the ornaments, fold each piece in half. Fold so that the decorations are inside. Glue the sides together.
